Expand Your Portfolio with ASATech's Advanced ICB Preservation Solutions

Short Summary

ASATech is seeking resellers in Spain for our high-end, customized ICB covers. Our innovative, hybrid preservation solution is already trusted by global leaders in wind power projects and is versatile enough for industries such as defense, machinery, aviation, rail, and aerospace. The cover offers exceptional protection against water, UV rays, dust, and is shrinkable up to 20%. The covers contain EXCOR ICB (Intelligent Corrosion Blocker), which is among the best corrosion protection on the market.

Full Description

Join the ASATech Network: Resell Our Premium ICB Preservation Solution

ASATech is proud to offer a cutting-edge, customized ICB cover designed and manufactured in Europe, available for distribution worldwide. We are looking to expand our network of resellers in Sweden, Finland, Spain, Italy, Estonia, Latvia, and Lithuania. Our hybrid ICB cover, which combines premium corrosion protection technology with superior physical protection, is the preferred choice for some of the largest players in the wind power sector. However, its benefits extend far beyond, making it an ideal solution for a wide range of industries including defense, machinery, aviation, rail, aerospace, and many more.

Unique Selling Points of ASATech's ICB Cover:

- Water Resistance: The cover's outer layer is engineered to resist rain, moisture, snow, and sleet, ensuring your assets remain dry and protected in any weather condition.
- All-Climate Effectiveness: Whether exposed to intense sunlight or harsh winter conditions, our ICB cover provides robust UV and dust protection, safeguarding your equipment from environmental degradation.
- Shrink ability: Our cover is designed to shrink up to 20%, offering a snug and secure fit around various shapes and sizes of the component.

By becoming a reseller of ASATech's high-end ICB preservation solutions, you will be offering your clients a product that stands out in terms of innovation, reliability, and versatility. Our ICB covers not only extend the lifespan of critical equipment but also ensure optimal performance, making them an invaluable addition to any protective measures.

Join us in delivering superior preservation solutions and expand your product offerings with ASATech's state-of-the-art ICB covers. Contact us today to learn more about this opportunity and how you can benefit from partnering with a frontrunner in the preservation industry.
